## JUMBO WATER SOFTNER

Wall Mounted /Hanging/Water Softener for Bathing / Washing  
and for RO Machines

### Features

- It is very easy to install and operate.
- Compact design, it can be fitted easily to all types of household appliances.
- Equipped with a valve, it can be regenerated in minutes.
- No need to call a technician for putting salts.
- Aquarius Easy Regeneration Technology, to regenerate, all you have to do is to put NaCl (Normal Salt) in the upper chamber of the softener. The salt regenerates the resin beads installed in the purifier. These resin beads then convert hard water into soft water by exchanging hard salts of Calcium and Magnesium with Sodium.

# AJLON TECHNOLOGIES

- This can be easily done with the help of resin beads charged with sodium salts, which attract hard salts and convert them into soft salts.
- The regeneration is required after treating 1000 liters of hard water (based on hardness of water)

## Regeneration process

- After 1000 liters usage of water (based on hardness of water) regeneration is required to bring softer resin to its full power of water softening

## Area of installation

- ✓ Water softener for whole house filtration/ bath room installation.
- ✓ Can be connected directly to main bathroom line.
- ✓ U can connect multiple no's of this items in parallel to get prolonged usage.

## Specification

<b>dimensions(mm)</b>	
<b>Volume</b>	<b>7 liter resin</b>
<b>Weight</b>	<b>5 kg</b>
<b>Flow Rate</b>	<b>1500 LPH</b>
<b>Color/ Finish</b>	<b>Blue</b>

## **Application :**

### **FOR WASHING MACHINES**

Jumbo Water Softener helps generate extra lather, thereby providing superior and brighter washing using less detergent. The clothes also become softer and cleaner.

### **FOR GEYSERS**

The soft water prevents formation of salt deposits in the geyser and thus ensures its long life. It helps generate extra lather due to which soap readily mixes with water and the skin does not feel dry. One is also able to rinse hair better, making them smooth and silky.

### **FOR DISHWASHERS**

Use of soft water in dishwasher protects expensive cutlery as it prevents formation of chalky white spots.
