

Electronic Water Softener /Conditioner (EWC)

Residential Water Softener

Industrial/ Agriculture Water Soften

We are among the pre-eminent organizations, involved in Manufacturing, supplying, trading and exporting Electronic Water Conditioner. The offered product is widely demanded by customers to change hard water molecules to soft crystals. These products are available in different models and can be customized as per the Specifications laid down by the clients.

Features:

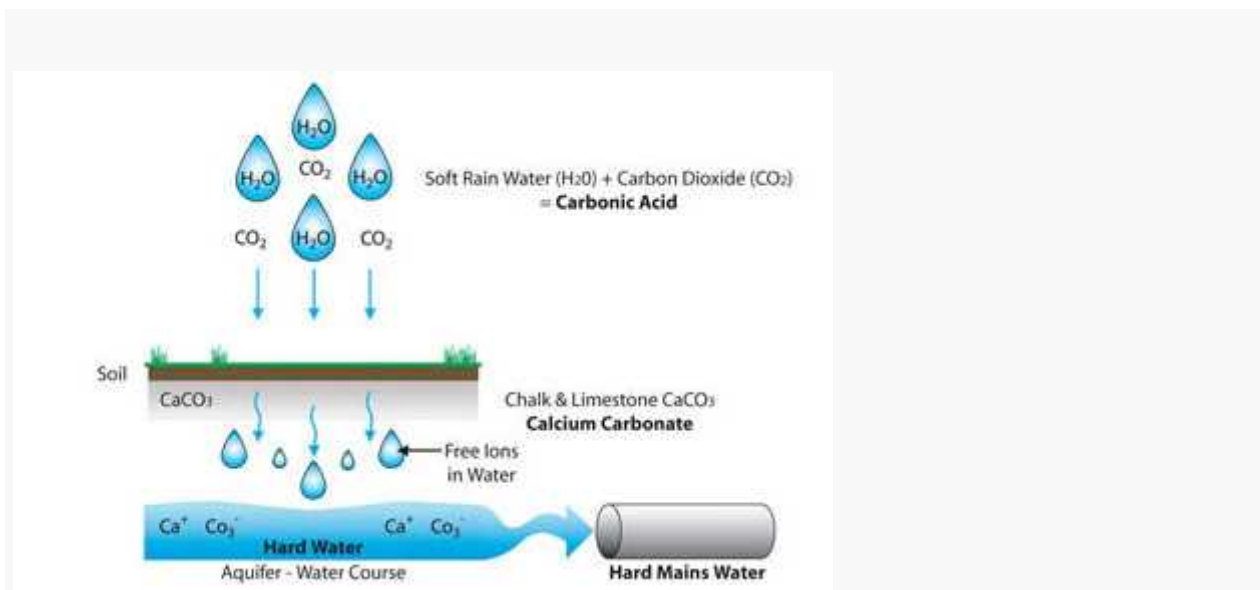

- ❑ Easy to install
- ❑ Longer life
- ❑ Low power consumption

Other Details:

- ❑ Easy to install i.e. no plumbing or special skills needed
- ❑ No maintenance - set it and forget it
- ❑ Safe low voltage, low power
- ❑ Takes very little space
- ❑ Wrap the signal cable and plug converter into 110 volt outlet
- ❑ Treats hardness from 3 grains
- ❑ No salt or chemicals needed
- ❑ Water lathers and rinses easily
- ❑ Prevents scale formation
- ❑ Reduces detergent use

- ☐ Increases water heater efficiency
- ☐ Prevent scale formation
- ☐ Reduces detergent use

Working Principle:

HARD WATER : THE SCIENCE BEHIND THIS...

Hard water is water that has a high mineral content. This content usually consists of high levels of metal ions, mainly calcium (Ca) and magnesium (Mg) in the form of carbonates, but may include several other metals as well as bicarbonates and sulfates. [Read More...](#)

EFFECTS OF HARD WATER

When the Hard water pressure changes as it does when leaving a tap or suddenly changing direction in an L-bend pipe, the Calcium Carbonate comes out of solution and reverts back to chalk once again. This chalk is of course now called lime scale but is still hard deposits of chalk. [Read More...](#)
